

Overall Sales Trend and Rock Music Comparison

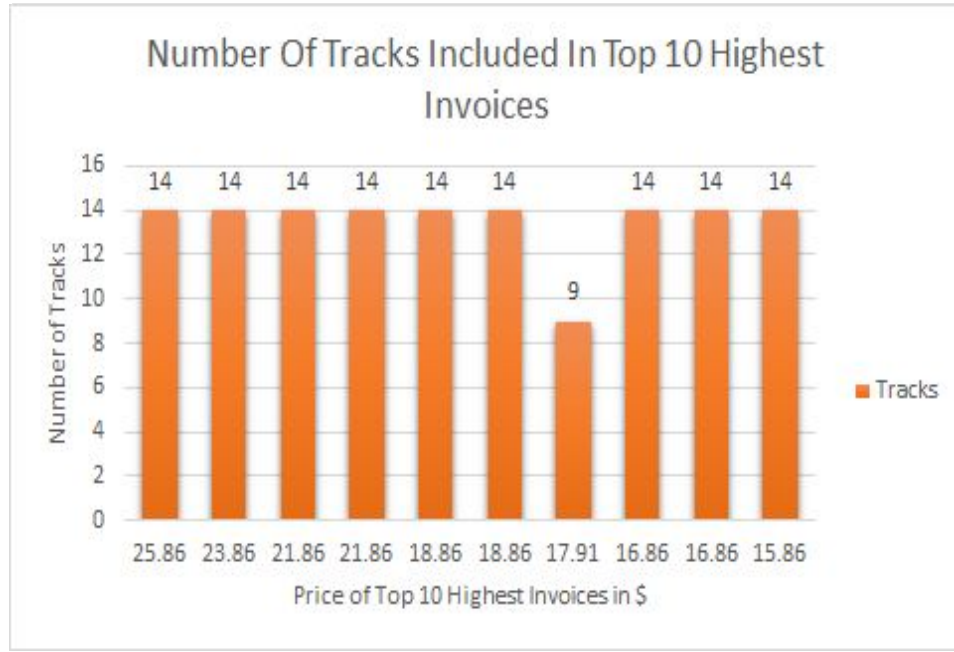

The chart on the left shows the overall sales trend from 2009 until 2013. We can see that the sales are pretty much constant with small peaks in 2010 and 2012. We can see that the Genre 'Rock' contributes a major part to the overall sales in every year. While this genre has lost some popularity in 2010 and 2011, we can see that the sales for Rock has risen for 2012 and 2013, even though the overall sales dropped a little in 2013.

Top 5 Artists in 3rd Best-selling Country

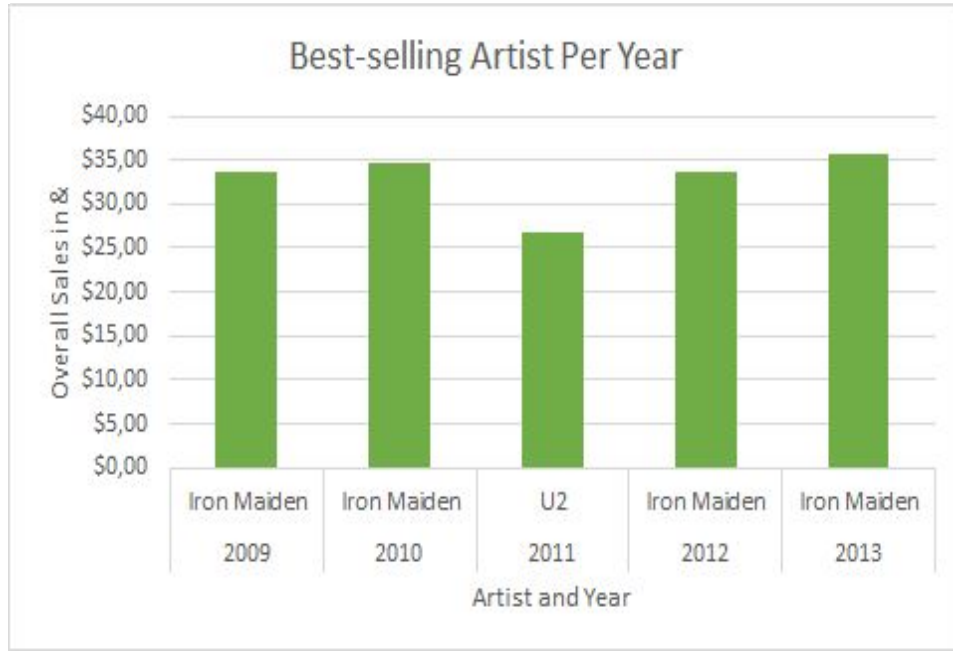

This chart shows the top five best-selling artists in the third best-selling country, which appears to be France. We can see that french customers prefer “Creedence Clearwater Revival” over all other artists. In second place is “Titãs” and in third place are the “Red Hot Chili Peppers”. The fourth and fifth place are shared among “Miles Davis” and “Gene Krupa”.

Number of Tracks Included in Top 10 Highest Invoices

The chart on the left shows the number of tracks which were included in the top 10 invoices according to their price. We can see that the price for the invoices range from \$25.86 to \$15.86, while all of them except one did include 14 tracks. Only one invoice with a price of \$17.91 did include only 9 tracks. That means that this invoice consisted exclusively of \$1.99 tracks.

The Best Selling Artist Per Year

This chart shows the best-selling artist per year with their overall sales included. We can see that "Iron Maiden" is the best-selling artist for four out of five years of record. They(the band) have reasonable constant sellings over the years 2009, 2010, 2012 and 2013 with amounts between ~\$33 and ~\$36 with 2013 being their best year according to sales in our company. Only in 2011 they were overtaken by U2 with an amount of ~\$26.
